TITLE OF THE TALK

Name SURNAME

Institution, City, Country

name@example.com

The opening paragraph should briefly explain the relevance of the topic, state the purpose of the study, and identify the methods used. The following paragraphs present the principal findings, their scientific or practical significance, and concise conclusions. References are cited in square brackets, for example [1].

Theorem 1. *Let $f(x, y)$ be continuous in a domain D and satisfy the Lipschitz condition with respect to y . Then the corresponding initial value problem has a unique local solution.*

Proof. This part should contain a concise presentation of the principal steps of the proof. ■

An inline reference is formatted as follows: Theorem 1.

An example of a numbered equation is

$$y'(x) + p(x)y(x) = q(x), \quad x \in [a, b]. \quad (1)$$

Equation (1) is referenced in the text in this form.

A system or a multiline formula may be typeset as follows:

$$\begin{aligned} \frac{\partial u}{\partial t} - a^2 \Delta u &= f(t, x), \quad (t, x) \in (0, T) \times \Omega, \\ u(0, x) &= u_0(x), \quad x \in \Omega. \end{aligned} \quad (2)$$
